PROFILE

Currently pursuing MCA with a completed B.Sc. in Information Technology (B.Sc. IT) with distinction.

Familiar with frontend development using React.js and TypeScript.

Actively learning and building backend APIs using .NET Core Web API.

Eager to grow as a developer, continuously improving skills and exploring new technologies.

PROJECTS EXPERIENCE

Library Management system

JANUARY, 2024

Front-end : Windows Forms Application (C# - .NET Framework)

Back-end : Microsoft SQL Server

- Developed a desktop-based library management system to manage book records including insert, update, delete, and view operations.
- Integrated date and time functionality to log book addition and modification events.
- Designed user-friendly forms for efficient interaction with book data.
- Connected the application to a SQL Server database for persistent storage of book details.
- Ensured basic validation and error handling for accurate data entry and updates.

User Management System

MAY, 202 4

Front-end : React.js with TypeScript

Back-end : Microsoft SQL Server, .NET Core Web API

Third-party APIs: Integrated for authentication

- Developed a web-based user management system to add, update, delete, and list users using a modern React + TypeScript interface.
- Created secure RESTful APIs using .NET Core for managing user Data.

College Attendance Management System

APRIL, 2025

Front-end : PHP Framework.

Back-end : MySQL/phpMyAdmin)

- Developed a complete attendance system with separate logins for admins and teachers to manage student and employee attendance.
- Enabled teachers to mark student attendance daily through a secure, role-based login panel.
- Admins can view and manage day-wise attendance records for all employees and generate reports based on custom date ranges.
